We have just defined, with the help of Webster's New World Dictionary, what it takes to care for a Kährs Life floor - EASY MAINTENANCE. Essentially, keeping up a Kährs Life floor is not difficult. The steps are simple and painless. In order to preserve its beauty and durability for years to come and to ensure coverage under Kährs Life 15 Year Residential Warranty (5 Year Commercial), you should follow these guidelines.

Common Sense Care & Maintenance

Immediately: Blot up spills or spots with a lightly damp (well- wrung) cloth.

Frequently: Vacuum or sweep your floor daily to prevent dirt, dust and grit from scratching or dulling its finish.

Periodically: To help extend the life of a Kährs Life floor and to remove all cloudy residue or dulling dirt-film layers, clean it regularly with Kährs Cleaner. Complete instructions can be found on the label of each bottle of cleaner.

Kährs Cleaner is specially formulated to clean our floors. It's a cleaner, not a polish, and it contains no waxes or oils. However, since it removes the dulling residue that builds up on the surface of the floor and dries clear with no streaking, it appears to enhance the shine.

Easy & Safe to use in your home!

- Non-toxic vapor
- Non-flammable
- Highly transparent
- Extremely effective

Kährs Cleaner is available at www.kahrstore.com

Added Protection

Once your floor is installed, nothing is more discouraging than discovering indentations or scratches that could have been easily prevented. Kährs Life can be damaged by sharp appliances and heavy loads on furniture legs. Some furniture manufacturers place small- bearing metal or plastic domes, or hard rollers on furniture legs that can cause damage to a Kährs Life or any floor. Combat this potentially damaging problem by using wide-bearing and non-staining glides and casters and by placing Floor Protectors beneath the feet of all furniture legs.

Floor Care Tips

DO

- Support furniture and heavy appliances with wide-bearing, non-staining glides or casters.
- Move appliances and furniture into place by sliding them slowly over the floor on a clean piece of carpet (turned upside down), or on Masonite with the smooth side down.
- Place a quality door mat at the entrance of your home to help protect your floor from abrasive dust and grit and to help save unnecessary clean-up tasks.
- Maintain normal interior humidity levels. Kährs requires a relative humidity range of minimum 30%, maximum 60%.
- Place area rugs in high - or concentrated - traffic areas to make long-term maintenance easier and less expensive.

DON'T

- Do not wax the floor, use conditioners, acrylic waxes, or ammonia-based cleaners.
- Do not use steel wool on the floor.
- Do not use soap, vinegar or detergent solutions on the floor and never use a wet mop or pour water directly onto the floor.
- Do not use floor cleaning machines or steam cleaners.

Kährs Guarantee

When a residential floor has the highest quality in the industry, it should come with the strongest guarantee. Kährs provides a 15 Year Residential Guarantee (5 Year Commercial).

Installation Guarantee

We guarantee our floor installations for long-lasting performance when installed with Kährs installation material according to Kährs instructions. This 15 Year Residential (5 Year Commercial) guarantee applies to all Kährs Life flooring purchased after Feb 1, 2021.

Visual Appearance Guarantee

Each plank of Kährs Life flooring is carefully inspected by our quality control personnel prior to leaving our factory. We urge you and your installer to inspect each plank prior to installation. In the unlikely event that you encounter a visually defective plank prior to its installation, we will replace it free of charge. Simply return it with your receipt to your retailer for your free replacement. This warranty does not extend to cover flooring after installation. See Exclusions and Liability Limitations below.

Structural Guarantee

Kährs quality is more than skin deep and we extend our 15 Year Residential warranty (5 Year Commercial) to cover the structural integrity of every plank. All Kährs flooring is processed using a sophisticated bonding system with each plank constructed under intense heat and pressure to ensure quality.

In the unlikely event that the bonding or other structural aspect of a plank fails within the first year following installation, we will, at our option, either repair or replace the defective plank free of charge. If failure occurs more than one year after installation, we will replace the defective plank, exclusive of the costs of removal, reinstallation or refinishing. See Exclusions and Liability Limitations below.

Waterproof Guarantee

This Guarantee covers topical moisture (This Guarantee excludes water that may flow over the edge of any plank -i.e. joints, perimeter of room, cut boards).

- Normal cleaning with Kährs Floor Cleaner
- Moisture due to household spills
- Moisture levels from subfloor as long as levels do not exceed 3lbs. Calcium Chloride test or 92% Relative Humidity In-Situ for Float-In installations (75% RH max for direct glue down and/or Commercial Guarantee to apply)

Our floors are specifically designed to withstand the effects of normal moisture or dryness. The environment must be maintained between 55°-85° F, as well as 30%-60% RH.

If installed and maintained in strict accordance with our instructions (see Kährs Life Installation Guide & Kährs Floor Care Guide at [www. Should our flooring fail under normal moisture conditions, we will, at our option, repair or replace the damaged flooring one time.
